## CORRESPONDENCE.

To do not put letters was responsible for the opinion expressed by our Correspondents.

### THE SALARIES QUESTION.

TO THE "HONG KONG FREE PRESS."

Sir,—I was one of the many of a House in  
of the larger China ports, a happy establish-

in 1850 and still increasing, when the salaries of the public servants were reduced by adding their incomes and also because the salaries then paid were, as the colonies of the most advanced from home to govern the colony" always had been reduced. The Governor, in his early days of the Settlement, it was right that the salaries of the emipwos should be reduced. It did not affect me because I had no account; but all the others were, I believe, reduced, and I knew they submitted because they recognised that the reduction was necessary. It was proposed to reduce the salaries of the public servants here ten per cent. I thought that it was not the right policy to reduce the salaries of the public servants, but to hold of similar offices in other colonies and the circumstances of this place at the time and the position in the future. It was a great proposal, and I was as a Colonel, Secretary, what cannot be called a particularly reduced salary, and gambling—good grounds existed for reduction of the salaries of the public servants, and I was not in a position to do so, but I was one, including several of the public

[illegible]

was formerly put, not from what was temperamental, but from what was supposed to be the expected result of the exercise. The expected result was to give the clerks in Downing hall what attempt to justify. It seems pretty certain that Mr. E. Price and those Government servants who were in the habit of coming to dine with him will find that their vaunted ambition has overleaped itself and will fall on.

THE OTHER SIDE.

Hongkong, 1st December, 1892.

VISITORS' IMPRESSIONS OF  
—VICTORIA COLLEGE.

TO THE EDITOR OF THE "DAILY PRESS."

SIR—As strangers spending a few days in Victoria, we were much interested in a visit to Victoria College. Our visit was kindly accompanied by the Head Master, Dr. G. H. Bateson Wright, through the several departments of the College. The buildings have been erected on a very liberal scale. The class-rooms and audit-rooms are large, well lighted, and with good appliances, while the staff of professors and teachers seemed singularly fitted for their work.

In passing from class to class, we were im-

expressed with the thoroughness of the training which we have given them. It is the result of some of the questions put to them here evidence of this. We were especially interested in a department composed of the various nationalities of the Chinese people, and especially in the harmony with which the pupils belonging to it work together. It is also to be hoped that the large proportion of young men of Chinese parentage, who are now attending the college at the College, will be thereby fitted to fill places of usefulness and trust in the community. It is interesting to note the contentment and growing confidence and more diversified interests which these young men form so important part.

An inspection so cursory as ours could scarcely give a true picture of the work of the college. It is the institution we find that it shall continue to be carried on under the same liberal and efficient system in which it is now conducted, it is our hope that it will continue for the good of the people of the province.

In the management of educational establishments of this class, it is to be always remembered that the success of the institution depends on the large and continuous expenditure of means, which will be necessarily absorbed in the con-

penation of teachers, whose abilities entitle them to adequate salaries, and by the addition, from time to time, of apparatus, charts, and books, which are useful in illustrating the various departments of science or literature. When, however, a contracted policy is pursued, the effect can scarcely be otherwise than materially to curtail the usefulness of a good institution, its prestige is lost, and to a greater or less extent the original end is in money or talent sacrificed.

SAMUEL MOULTON,  
JONATHAN E. RHODES,  
from Philadelphia, U.S.A.

Hongkong, 30th November, 1893.

The *Kobe Chronicle* of the 20th states that the *Ningpo*, a steamer whose registered tonnage is 701, arrived at Kobe from Shanghai, and

the master, Simon, Berts & Co. came as the *Harvar* was about to sail. The accident occurred at Kobe on the 29th of the month. The *Harvar* was an Island Sea transport, named the *Harvar* after the captain, Nosenishi Yonashi, and was bound for Yokohama. The cargo was a large quantity of lumber. The captain, says the *Chronicle*, was severe, some of the foremen of the *Harvar* being carried away together with a portion of the cargo, and the vessel itself being severely damaged. The Japanese stevedores some a slight damage done to her stowage into the lumber without difficulty.

The *Kobe Chronicle* further states that no less than five matrimonial engagements were broken off following is one of a nature recently, it is said, been contracted in Kobe. There would have been six had it not been for the accident. It was in this way that Shin had been looking at the paper and said to him, "that was nice of the Nippon *Chronicle* to put on that new line of steamship marriages."

"New line of steamships—matrimonial," I understood. "Well, you are a scapard, you see, the Nippon *Yuseu* *Kishin* has the new-married couples in their hands, and they go better than to a place no longer named as *Kishin* 'W." It stood in blank space for awhile "W."

was subjected in consequence of the fallers of the strike. Mr. Rajpuroh himself supplied the money for the most of the strike, and the whole amount would have been forthcoming, it was pointed out. Since the defeat of the strike on Wednesday, the 10th inst., Mr. Rajpuroh's house has been rather disagreeably visited by the *dhokee* workers and the rich man's household once was reported to be scarcely fit for the safety of the family. The strike and financial crisis had defeated their object, and the latest development in this case was the action of three ardent politicians, *Kaushika*, who detected or thought they detected an attempt at unlawful interference in the strike, and who, in the name of the rights of the strikers, had proceeded to the *dhokee* bazaar. It seems that Messrs.
